FUNDS

Total amount of R437 000.00 reflected in Do4SA's account on the 22nd of September 2021.

Toolsets were ordered, manuals were finalized and printed, dates were set for training.

PROJECT

The project aims to create 50 000 self- sustainable 2m x 1m vegetable gardens in and around Gqeberha.

The project aims to be completed within a 2-year time frame.

Each garden manager who is supplied with the necessary skills and tools to make a success of their project

will be responsible for the maintenance and upgrading of their facilities with the support of DO4SA.

The projects which show the growth we are expecting can apply for assistance to upgrade their facilities from DO4SA and this application can be applied for after a site inspection has been done.

FUNDING

Thank you to Malcolm Stewart, that helped us to receive this funding. With this funding we already made sure that 84 individuals have food security, this is excluding the people below them that has also trained (as of last week – 38 people).

We still have 49 878 people to reach, but with the way the training is going and how many are interested, we are more than excited to be achieving our goal

before the end of 2023.

The funding helped us as Do4SA to make a remarkable difference in the lives of so many. This way, we are not only ensuring food security with many households but we are also teaching people necessary life skills as well as providing a way for them to eat healthy and even create a SMME.

CONCLUSION

This project is not only touching the lives of individuals but, touching the lives of households, schools, daycare's and so much more.

Knowledge is the best power anyone can have. Therefore we are empowering people to take control of their own situations.

Do4SA would like to thank you once again for this amazing opportunity we have to touch and change the lives of so many.
